Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The amendment received December 16, 2004 has been entered and the finality of the last Office action withdrawn. A non-final rejection follows.

Allowable Subject Matter

Claim 1-8, 10-21 and 25 are allowed.

The indicated allowability of claims 21 and 25 is withdrawn in view of a review of the reference(s) to Davancens et al. (US 5655264). Rejections based on the newly cited reference(s) follow. The inconvenience to applicant is regretted.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 22 and 23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Davancens et al. (US 5655264).

Davancens et al. (figures 1-4) teach a method for retaining an eyeglass in a desired position on the body of a user, the eyeglass having first and second temples and first and second earpieces coupled to respective temples, the method for retaining the eyeglass comprising: providing an eyeglass retainer comprising: a cord 18 having a first end and a second end; a first connector 12 coupled to the first end of the cord; and a second connector 12 coupled to the second end of the cord, wherein each of the first and second connectors is configured (i) to selectively receive and retain a temple of the eyeglass; and (ii) inherently capable to selectively

receive and retain an earpiece of said eyeglass; and inserting first and second earpieces of an eyeglass into respective first and second correctors of the eyeglass retainer, wherein each of the first and second connectors has a hole 39 therein and a slit 38 therein adjacent to the hole 39. As to claim 23, the eyeglass of Davancens is moved through two openings, one at the entrance of the slot 38 and the other at the exit of the slot 38.
